## Wind Power — facts and fiction

It's a jungle out there in the world of wind power, a jungle full of high expectations and huge potential. With all the emphasis on renewable energy resources, wind is almost always first on the minds — and in the faces — of Montanans. Yet, wind has its limits. Some straight talk.

## About our cover ...

Altamont Pass Wind Farm in northern California between Livermore and Sacramento boasts more than 6,000 wind turbines, in places from horizon to horizon. According to the online encyclopedia, Wikipedia, it was one of the earliest farms in the nation and still is the largest concentrations of turbines in the world.
