## What's your Global Warming IQ?

The debate over global warming is heating up faster than the earth itself. State legislators are imposing stricter standards on industry, including power generation facilities. The U.S. Congress and presidential candidates are all over the issue. Even the U.S. Supreme Court has weighed in on the side of regulation. What do you know about climate change? A quick quiz to catch you up on an ever-changing debate.

# 2

## Road to Doomsday?

Whom can you trust to give you the facts about global warming? Can you learn more from fiction? Some straight talk.

# 7

## Your lineman

Much of the early REA work was done by rural folk themselves. Today's lineman is immersed in physics and safety.

## About our cover ...

Central Montana's Crazy Mountains aren't really on fire. Actually the flames are from a controlled burn near Eureka, photo by Tim Engleson of Lincoln Electric. The "Road to Doomsday" is in eastern Montana. The image is our way of opening a discussion about the Doomsday scenarios of global warming.
